SYNOPSIS

This 2-day Residency Program focuses specifically on Navigation Implant Surgery and was designed especially for those who want to keep-up with the latest technology and introduce this valuable tool in their daily practice.

Comprising hands-on software sessions, the training will give clinicians a comprehensive perspective of the Implant Navigation System workflow, and its features and advantages, guiding them through single, partial and total rehabilitation cases planning and execution. Participants will get a chance to follow LIVE Surgery in the operation room, interacting closely with our clinical team, also getting a chance to discuss and plan their own cases with our expert.

Please take into consideration that the program is always dependent on the clinical and laboratorial departments' schedules patients' authorization. Surgeries scheduled at MALO CLINIC are dependent on the patient. The program may have to be adjusted, should a patient be delayed or re-scheduled the appointment. MALO CLINIC Education reserves the right to make other changes to it without prior notice. It is strictly forbidden to photograph or record during MALO CLINIC Education Courses or Clinical Residencies.
