SYNOPSIS

Shadowing an Oral Surgeon provides a better understanding of what a doctor's typical day is like, and a great way to gain familiarity with different surgical procedures and environments.

If you are a Dentist looking to increase your knowledge in different aspects of Oral Surgery including Implant Dentistry, this is the right venue for you!

Take advantage of shadowing Top Oral Surgeons like Professor Armando Lopes and Dr. Ana Ferro and learn directly from the source! Pick your Surgeon and Enroll!

Clinical features of Prof. Armando Lopes include Implant Dentistry, from single teeth, to the Full Arch Rehabilitation and Zygomatic implants; 3-D Navigated Surgery (X-Guide) and digital planning; Complications management (including surgical interventions to resolve implant complications).

Clinical features of Dr. Ana Ferro include Implant Dentistry, from single teeth, to the Full Arch Rehabilitation; Complications management (including surgical interventions to resolve implant complications); Periodontology; Extraction of wisdom teeth.

*Surgeries scheduled at MALO CLINIC are dependent on the patient. The program may have to be adjusted, should a patient be delayed or re-scheduled the appointment. MALO CLINIC Education reserves the right to make other changes to it without prior notice.

It is strictly forbidden to photograph or record during MALO CLINIC Education Courses or Clinical Residencies.
